

Dr. Sheena Francis is a Research Fellow at the Natural Products Institute, University of the West Indies (UWI), Mona, Jamaica. She holds a PhD in Zoology from UWI, Jamaica, and is part of a team of researchers investigating insecticidal resistance in mosquitoes that carry diseases of interest to humans. Her work includes testing the efficacy of organic compounds as pesticide-synergists and or insecticides against mosquitoes. Earlier, she was involved in research which utilizes natural products from the Caribbean against life threatening illnesses such as tuberculosis and cancer.
